OPUS
OFF-ROAD

"THE AWARD-WINNING AIR SYSTEM EXPANDS TO ABOUT EIGHT FEET TALL AND 121 SQUARE FEET IN TOTAL"

OFF-ROAD RUGGED

The OP2 has a single bed lid that opens to a large queen bed and spacious lounge. The exterior was designed with an extended front tool box, stackable storage and a built-in hot water shower.

The OP2 features an all-terrain chassis with Off-Road 15" tires and independent coil suspension, built to follow any 4WD vehicle through the roughest terrain. The 2024 OP2 comes with a 33 gallon freshwater supply and 3-4 days of built in battery life (with solar power and lithium battery options). The large tent extension works as a space for hot water showers and provides privacy so you can get off grid in comfort.

OUTDOOR KITCHEN

The OP2 stainless steel kitchen slides out to a fully-functioning offgrid outdoor cooking experience so you never miss a moment of the action.

The upgraded front toolbox provides stackable storage with tons of pantry space and a 63 QT 12v fridge. The 2023 models also have LED lighting running along the top of the stove and spicerack for added visability at night.

OP2 KITCHEN FEATURES:

- 4-burner stove
- Sink with running water
- Wind guards
- LED outdoor cooking light
- Stainless steel chopping board
- 12v electric fridge.
- Hot water connects

AIR TENT TECHNOLOGY

The OP2 features our innovative, multi-award winning AIR OPUS tent, which allows you to effortlessly set up your tent at the touch of a button. Our patented AIR Inflation technology incorporates a built-in compressor which inflates the tent in just 2 minutes. The AIR tent frame is built to withstand rough weather conditions while providing you with a bright, spacious, comfortable living space.

COVER OPTIONS

The 2024 models include the option for an AIR Canopy or AIR Annex. Both options connect directly to the AIR tent and can be packed-down with your camper during travel and storage.

AIR ANNEX

The new lightweight AIR Annex includes two extra bedroom pods and an extended living area. This option takes an additional 2 - 3 minutes to inflate with your on-board air compressor. With a fully enclosed living space and a large protective floor, the AIR Annex adds space to sleep an additional 4 adults.

AIR CANOPY

The AIR Canopy is a lighter option to the full AIR Annex. Extending the full width of your camper, the AIR Canopy takes an additional 90 seconds to inflate and provides full kitchen coverage for protection from rain and sun.
