Security Package

**OPUS**  
**OFF-ROAD**

"THE OPUS IS BUILT WAY BETTER THAN ANY OTHER TENT TRAILER OUT THERE. BUILT TO LAST. IT'S EXTREMELY WELL THOUGHT OUT AND ENGINEERED. AND IF YOUR VEHICLE CAN GET THERE, SO CAN THE OPUS. "  
- ADAM C.

## OFF-ROAD & OFF-GRID READY

Our chassis is designed to tackle any terrain and attaches to a Cruisemaster DO35 articulating hitch - the best off-road hitch on the market providing 360° mobility while towing. We've also beefed up the suspension, installed heavy-duty coil springs, along with a dual shock axle, and angled the rear of the trailer to provide an impressive rear departure angle, making the Opus your perfect overlanding companion. With 40 gallons of water on-board, lithium batteries, solar charging, 20lb propane tank holder, and DC-DC charging options, you can get off the grid while still living luxuriously.

## OUTDOOR COOKING EXPERIENCE

The OP4 stainless steel kitchen slides out to a fully-functioning off-grid outdoor cooking experience so you never miss a moment of the action. Includes a 4-burner stove with wind guards, stainless steel chopping board, sink with running water, LED outdoor cooking light and a 12v electric fridge.

## GEAR & TOYS

With two reinforced lids and a universal racking system, the OP4 is the perfect load-carrying platform and can handle up to 500 lb on the roof rack. This makes it easy to bring all the toys - carry boats, bikes, kayaks, gear, and more. Even with these features, the GVWR remains incredibly low at 4200 lbs.

## AIR BEAM TECHNOLOGY

**BUILT TO WITHSTAND ROUGH WEATHER WHILE PROVIDING A BRIGHT & SPACIOUS LIVING SPACE**

✓ BUILT-IN AIR PUMP INFLATES TENT IN 2 MINUTES

✓ DURABLE DESIGN WITH 9 INDIVIDUAL AIR BEAM

The OP4 is designed with our patented AIR Inflation technology with an onboard 12v air compressor allowing you to effortlessly inflate your tent in under two minutes. With 9 individually valved air beams, the tent is designed to stand firm through rain and wind. With far more headroom than any other off-road camper on the market, the OP4 has 8-foot high ceilings, multiple sunroofs, and dozens of windows.

### WEATHER

The Opus can handle any kind of weather! The tent is completely waterproof and can stand winds up to 55MPH without any compromise to its stable structure. Although the canvas is still a tent, it's made from very high-quality poly-cotton so it is well insulated. With our tropical rain fly, you'll stay protected from the elements while still being able to open your sunroofs for ventilation.

## COVER OPTIONS

If you'd like to get out of the sun or cook during rain, we have two awning options to keep you covered: the AIR Canopy or AIR Annex. Both connect directly to the AIR tent & pack-down with your camper for travel & storage.

### AIR ANNEX

The AIR Annex is fully enclosed with a large protective floor & two additional bedroom pods. It inflates 2 - 3 minutes with the air compressor and adds 4 additional sleeping spaces.

### AIR CANOPY

The AIR Canopy is a lighter option to the full AIR Annex. Extending the full width of your camper, the Canopy takes 90 seconds to inflate and provides full kitchen coverage reaching 10 feet high.

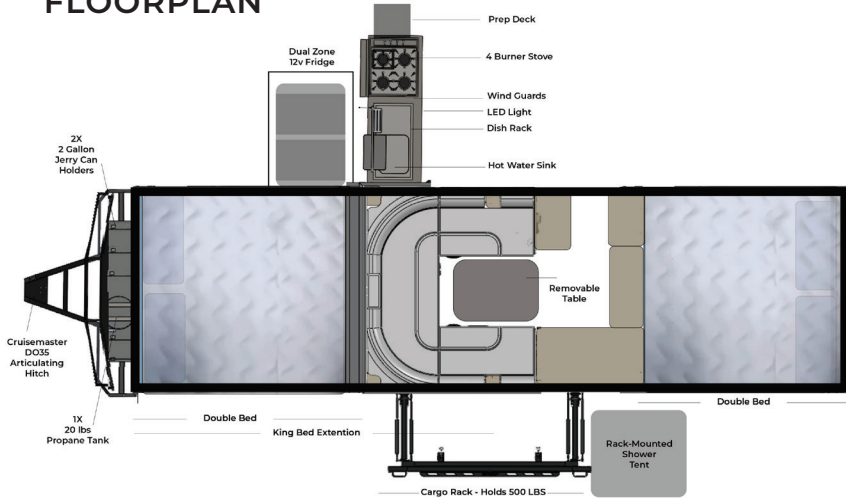

## SPECIFICATIONS

DIMENSIONS (OPEN)	L20' x W7'2"
DIMENSIONS (CLOSED)	17' (INC. SPARE WHEEL) x 7'2"
